PROJECTS

- **OVERNIGHT CARS CALCULATOR**
  https://imsamuelsuarez.github.io/overnightCars/

  I did this project using vanilla web stack (HTML, CSS, Javascript). This project helps a car parking company to calculate how much clients should pay when their cars stayed overnight.

- **PERSONAL WEB PAGE**
  https://imsamuelsuarez.github.io/personalPage/

  I did this project using vanilla web stack (HTML, CSS, Javascript). I made it to show my skills in web development and also create a portfolio. Im on my way to remake it with Svelte
